

Web Dev 1

Weekly Project Report – Week 4

Please provide a brief overview of the research or tasks that were completed on your project this week. (This should take no longer than 10 minutes to complete):

I did a sketch-up as to how I want the webpages to look so that I would have a good idea as to how I wanted everything to look and flow.
After being really frustrated with not getting three.js and realising that it was unnecessary, I decided that it'd be a better idea to have a plan done out first, rather than hacking everything out in a single go and needing to change something later on.
