Web Dev 1

Weekly Project Report – Week 3

Please provide a brief overview of the research or tasks that were completed on your project this week. (This should take no longer than 10 minutes to complete):

I spent the majority of the week trying to use three.js so that the home page could be a 3D model with animations rather than having a full-screen background video automatically playing.
Due to errors, unforeseen behaviours, and instalment problems, it was taking too much time so I decided to leave it and just stick with regular JS and CSS.

I made a few more adjustments to the home page.
